COLUMBUS HOSPITAL

NEW YORK CITY

No. 7-424

NAME Albizu, Campos P. 400

AGE 52

WARD ROOM 710

Chief Complaint

Chief complaint of sharp almost
intolerable pains originating in the left
testicle and ascending upward to waist
+ shoulder to arm + left side of face to a
concentration in the left eyeball
the left arm is paralyzed - when this
pain occurs - pt has no power of motion
in the arm + face - it is very severe -
Previous history - about 3 years ago
and too exact + at that time was
a severe uremia which required
dialysis - he was certainly ill
at that time - before this the pt. has
never been seriously ill.

ADDRESS _____

Re. 710

HOSPITAL SERVICE OF DR. E. Secundari

O. P. D. CLINIC OF DR. _____

AL DIAGNOSIS _____

X RAY No. 1137 6-9-43

ROENTGENOGRAPHIC REPORT

1. CHEST: Fibrotic changes are noted throughout both lungs. A small calcification is present in the right middle lung field and fissures in the same area are slightly thickened. The heart and aorta are small.
2. Cervical Spine, right lateral view:
There is no evidence of any gross changes, only minimal kyphosis is noted in the upper one-half.
3. Left Shoulder, A.P. view:
There is no evidence of any gross changes of bones and film does not show any calcification in the soft parts.

IMPRESSION: MODERATE PULMONARY SCARRING, ALSO CALCIFICATION IN THE RIGHT MIDDLE LUNG FIELD.
